A Variation-based Framework of Effective Teaching and Learning

Ellen ZHANG
(yfzhang@ied.edu.hk, 852-2948 8327)
Steps in a Learning Study cycle & the use of variation (5:29)

Select a topic for study (V2)

Identify a tentative object of learning (V2)

Diagnose students’ learning difficulties (pre-test, interviews) (V1)

Confirm the object of learning & its critical aspects

Plan the research Lesson (V2, V3)

Different teaching cycles

Evaluate the learning outcomes (post-test, interviews) (V1)

Evaluate the overall impact of the study (V2)

Implement & observe the lesson (V1, 2, 3)

Disseminate & report the results (V2)

Another cycle of the study
Variation Theory
（變易理論）

Ference Marton

Variation Theory

What should students learn?

• Learning is always directed to something (the object of learning, OL, 學習內容).

• Learning is changing the way of seeing the OL in a new and meaningfully way.

• Each OL bears many features and some are critical to certain students (necessary but missing in students’ minds, CF=critical features, 關鍵特徵) (Japanese).

(Teachers need to identify the critical features before teaching.)
Variation Theory

How do students learn it?

• We human beings can only focus on one feature at a time.

• Learning is a discernment and discernment can be best achieved through variation (Japanese).

• In order to discern the critical features, a person needs to experience variation corresponding to these features (wishing well).

(Teachers need to draw students’ attention to CFs via variation.)
Teaching is a deliberate art!

Students

Teacher

Content

Identify appropriate OL & CFs

Organize and highlight CFs

Engage students in learning

① What should students learn (CFs)?
② How do students learn it?
③ How do we make student learning happen?
A Variation-based Framework of Effective Teaching and Learning

1. Sort out the structure of the object of learning
2. Understand students’ ways of seeing the object of learning
3. Identify the critical features based on students’ learning difficulties
4. Design the variation patterns corresponding to the critical features
5. Select activities and teaching strategies for students to experience variation
A Variation-based Framework of Effective Teaching and Learning

1. Sort out the structure of the object of learning
Effective Reading Strategies

- Summarizing
- Having a Purpose
- Identifying Text Structure
- Previewing
- Predicting
- Skimming
- Scanning
- Evaluating
- Drawing Conclusions
- Visualizing
- Making Inferences
- Using Contextual Clues
- Questioning

(Moh, 2010)
Contextual clues

- connectives
- parts of speech
- synonyms
- antonyms
- collocation
- sentence structure
- references
- word structure
A Variation-based Framework of Effective Teaching and Learning

1. Sort out the structure of the object of learning
2. Understand students’ ways of seeing the object of learning
Understand students’ ways of seeing OL

- Prior knowledge (fractions)
- Use of strategies / skills (contextual clues)
- Thinking process (addition)
- Current understanding (questioning in class)
- Learning difficulties (the image)
A Variation-based Framework of Effective Teaching and Learning

1. Sort out the structure of the object of learning
2. Understand students’ ways of seeing the object of learning
3. Identify the critical features based on students’ learning difficulties
Tom _____(eat) an apple every day.
Tom _____(eat) three apples every day.

**Confirmed Object of learning:** to build up the awareness of subject-verb agreement in positive statements (simple sentences) of the simple present tense.

**Confirmed Critical features:**

1. The concepts of subjects, verbs and objects.
   - A subject is the noun or pronoun (or persons or things) that does the action.
   - A verb talks about an action (**only action verbs are used**).
   - An object receives the action of the verb.

2. The verb is determined only by the subject in terms of number (singular or plural) and person (first, second, and third person).

3. For the third person singular subjects (singular nouns, uncountable nouns, etc.), we change the verb form by adding either ‘-s’ or ‘-es’ (the third person singular verb) in the simple present tense. For the other subjects, there is no change to the verb form.
Confirmed Object of learning: to build up the awareness of subject-verb agreement in positive statements (simple sentences) of the simple present tense.

Confirmed Critical features:
1. The concepts of subjects, verbs and objects.
   - A subject is the noun or pronoun (or persons or things) that does the action.
   - A verb talks about an action (only action verbs are used).
   - An object receives the action of the verb.

2. The verb is determined only by the subject in terms of number (singular or plural) and person (first, second, and third person).

3. For the third person singular subjects (singular nouns, uncountable nouns, etc.), we change the verb form by adding either ‘-s’ or ‘-es’ (the third person singular verb) in the simple present tense. For the other subjects, there is no change to the verb form.

4. The verb form is not determined by the object.
The text can be understood by using the words and phrases you know.

2. you can apply the following strategy to get the meaning of a text:
1) ONE sentence at a time.
2) Focus on what you KNOW and translate the words and phrases you UNDERSTAND.
3) Use these words and try to understand the meaning of the words and phrases surrounding that word and the whole sentence.
4) Read the other sentences in the same way.
5) Draw conclusions on what the text is about.
A Variation-based Framework of Effective Teaching and Learning

1. Sort out the structure of the object of learning
2. Understand students’ ways of seeing the object of learning
3. Identify the critical features based on students’ learning difficulties
4. Design the variation patterns corresponding to the critical features
The functions of Variation

• Variation for **Generalizing Rules**

• Variation for **Comparing Differences**

• Variation for **Separating Concepts**

• Variation for **Integrating Features**
Variation Patterns

• Variation is controlled focused organized changes/differences in the teaching arrangement (including language examples, activities, etc.) (contextual clues).
  – Controlled with some features kept constant
  – Focusing on the CFs
  – Organized to logically illustrate the structure of CFs (a good speech)
The students need to experience the variation so that they can master the CFs.

(The Cantonese Opera)
A Variation-based Framework of Effective Teaching and Learning

1. Sort out the structure of the object of learning
2. Understand students’ ways of seeing the object of learning
3. Identify the critical features based on students’ learning difficulties
4. Design the variation patterns corresponding to the critical features
5. Select activities and teaching strategies for students to experience variation
Important teaching strategies

• Questioning techniques (**alliteration**)
  – Focus on the CFs
  – Guide students to experience variation and discern the CFs

• Use of visual aids (**blackboard**, PPT)
  – Help highlight the CFs
  – Show the learning process (focus, logic)

• Cooperative learning (**Little Angel**)
A Variation-based Framework of Effective Teaching and Learning

1. Sort out the structure of the object of learning
2. Understand students’ ways of seeing the object of learning
3. Identify the critical features based on students’ learning difficulties
4. Design the variation patterns corresponding to the critical features
5. Select activities and teaching strategies for students to experience variation
Lived learning objectives

Intended learning objectives

Enacted learning objectives

(teaching

(re-)design

evaluation

Object of Learning
Teaching is a deliberated art.

- We need to be more sensitive to **student learning**
- We need to **choose the CFs** more carefully
- We need to **present CFs with variation systematically and purposefully**
- We need to engage students in continuous learning with **various strategies**
How to cater for individual differences, especially SEN students?
The true meaning of education

Life influencing life
If we keep our hopes and try our best in teaching, our students will also do the same.
