

A key event organised by the Academy is the APS Global Education Conference, which is held yearly on educational leadership. The objective of the conference is to provide a platform for school leaders to learn and share in all aspects of leadership in education. The conference also provides opportunities for invaluable personal and professional networking among the school leaders. The large attendance during the past conferences is evident that school leaders had benefitted from the various learning opportunities provided.

"A major platform for professional learning has been the biennial Global Education Conference for School Leaders."

- Ms Ho Peng, Director-General of Education, 2012
